

# Achieve A Lifelong Healthy Beautiful Smile For Your Child

**WeLCOMe**  
ORTHODONTICS

*Orthodontic treatment can be started on certain types of tooth problems even before all permanent teeth have erupted.*

**M**aking sure your children have healthy and strong teeth is a vital part of their development. Their teeth are for life and you must ensure that they're looked after and treated in safe hands. Coming to see our highly-trained, award-winning orthodontic specialist Dr Chaw-Su Kyi, your children's teeth are in safe hands with her vast experience of successfully treating over a thousand children. Making sure you and your family are completely relaxed, our team are ready to look after your family at our offices in Harley Street and Hammersmith. Many of her patients choose Dr Kyi as her forward-thinking approach for early corrective treatment can prevent the need for more complex treatment later in their teens.

“ I have to say what a pleasure it has been visiting Dr Kyi and her colleagues for my daughter. Sophie was always made to feel at ease and we are of course thrilled with the exceptional result that been undertaken. Welcome Orthodontics have always gone beyond to help and ensure that we were looked after with our irregular schedules and requirements. I highly recommend. ”

With orthodontic evaluations and treatment, Dr Kyi will be able to:

**Before**

**After**

- Lower the risk of trauma to protruded front teeth
- Correct harmful oral habits e.g. thumb sucking
- Reduce the risk of plaque and food trap due to crowded teeth
- Guide jaw growth e.g. to correct overbites
- Correct cross-bites that can lead to facial symmetric growth
- Guide permanent teeth into a more favourable position
- Create a more pleasing arrangement of teeth, lips and face
- Possibly reduce the need for further treatment when patients are older

Come and schedule your orthodontic assessment with Dr Chaw-Su Kyi
